Sri Lanka Institute of Information Technology

IT2130 – Operating Systems and System Administration
Year 2, Semester 2- 2026

Practical Answer Submission

Practical Sheet No: 2

Student ID	IT24101803
Student Name	Harikaran T.
Campus/ Center name	SLIIT Malabe
Specialization	ISE
Batch No	01.01

Activity 1)

```
  GNU nano 7.2                          L2A1.c *
        int mark1,mark2;
        float average;

        printf("Input the 1st mark : ");
        scanf("%d", &mark1);

        printf("Input the 2st mark : ");
        scanf("%d", &mark2);

        average = (mark1 + mark2)/ 2.0;
        printf("The average is : %f\n", average);

        return 0;
}

^G Help      ^O Write Out ^W Where Is  ^K Cut       ^T Execute   ^C Location
^X Exit      ^R Read File ^\ Replace   ^U Paste     ^J Justify   ^/ Go To Line
```

```
Input the 1st mark : 30
Input the 2st mark : 50
The average is : 40.000000
```

Activity2)

```c
#include <stdio.h>
int main() {

        int mark1,mark2;
        float average;

        printf("Input the 1st mark : ");
        scanf("%d", &mark1);

        printf("Input the 2st mark : ");
        scanf("%d", &mark2);

        average = (mark1 + mark2)/ 2.0;
        if(average >=45){
        printf("Pass\n");
}
        else{
        printf("Fail\n");
}
        printf("The average is : %f\n", average);

        return 0;
}
```

```
Input the 1st mark : 50
Input the 2st mark : 60
Pass
The average is : 55.000000
```

Activity3)

```c
#include <stdio.h>
int main() {

        int age;
        char gender;

        printf("Enter the age  : ");
        scanf("%d", &age);

        printf("Enter gender(m/f)  : ");
        scanf("%c", &gender);

        if(age>=65 && gender== m){
        printf("Senior Male citizen")
}

        else if(age >= 65 && gender == f){
        printf("Senior Femle citizen")
}

        return 0;
}
```

```
Enter the age  : 88
Enter gender(m/f)  : m
Senior Male citizen
```

Activity 4)

```c
#include <stdio.h>
int main()
{

        int marks;

        printf("Enter the marks : ");
        scanf("%d", &marks);

        if(100>= marks && marks>=80){
                printf("A");
}

               if(79>= marks && marks>=70){
                printf("B");
}

               if(69>= marks && marks>=45){
                printf("C");
}

               if(marks<45){
                printf("F");
}

return 0;
}
```

```
Enter the marks : 60
C
```

Activity5)

```c
#include <stdio.h>
int main(){

        int num;

        printf("1. Hello\n");
        printf("2. Welcome\n");
        printf("3. Goodbye");

        printf("Enter the number(1/2/3)  : ");
        scanf("%d", &num);

        if(num == 1){
        printf("Hello");
}

         else  if(num == 2){
        printf("Welcome");
}

         else  if(num == 3){
        printf("Goodbye");
}

return 0;
}
```

```
1. Hello
2. Welcome
3. Goodbye
Enter the number(1/2/3)  : 3
Goodbye
```

Activity6)

```c
#include <stdio.h>

int main() {
    int mark;

    printf("Enter the mark obtained: ");
    scanf("%d", &mark);

    if (mark < 0 || mark > 100) {
        printf("Invalid mark entered.\n");
        return 1;
    }

    switch (mark / 10) {
        case 10:
        case 9:
        case 8:
            printf("Grade: A\n");
            break;
        case 7:
            printf("Grade: B\n");
            break;
        case 6:
        case 5:
            printf("Grade: C\n");
            break;
        case 4:

            if (mark >= 45) {
                printf("Grade: C\n");
            } else {
                printf("Grade: F\n");
            }
            break;
        default:
```

```
Enter the mark obtained: 70
Grade: B
```
