Shared Leadership in Agile Scrum Team – Role Play Script (20 Minutes)

Characters (6 Members)

1. Rotating Leader
2. Proactive Member
3. Passive Member
4. Confused Member
5. Accountability Advocate
6. Observer

Meanings of the 6 Roles (Simple Explanation)

1. Rotating Leader

Meaning:
The leader changes from person to person in each sprint or task.

In Agile Scrum, **there is not always one permanent leader**.
Different members **take turns to lead**.

Simple:

This person leads the meeting, assigns tasks, and coordinates the team for that sprint.

What they do:

- Start meetings
- Assign tasks
- Check progress
- Make decisions
- Help team coordination

---

2. Proactive Member

Meaning:
A hardworking team member who takes initiative and helps the team.

Simple:

This person works actively, finishes tasks, helps others, and supports the leader.

What they do:

- Finish tasks on time
- Help team members
- Give ideas
- Communicate well
- Support leader

---

3. Passive Member

Meaning:
A team member who does not take responsibility and depends on others.

Simple:

This person is lazy or inactive and doesn't finish tasks on time.

What they do:

- Delay work
- Depend on others
- Don't update progress
- Make excuses
- Cause delays

---

4. Confused Member

Meaning:
A team member who does not understand tasks, roles, or responsibilities.

Simple:

This person is confused because instructions are not clear.

What they do:

- Ask many questions
- Don't understand tasks
- Need clear instructions
- Get confused about responsibilities

---

5. Accountability Advocate

Meaning:
A person who makes sure everyone is responsible for their work and deadlines.

Simple:

This person talks about deadlines, responsibilities, and task tracking.

What they do:

- Remind deadlines
- Ask task progress
- Talk about responsibility
- Suggest using Jira/Trello
- Track team performance

This is like the **serious team member**.

---

6. Observer

Meaning:
A person who watches the team and gives feedback at the end.

Simple:

This person does not join the work; they watch how the team behaves and explain what happened.

What they do:

- Watch team behaviour
- Identify problems
- Identify good things
- Suggest improvements
- Give final feedback

PART 1 – ROLE PLAY ACTING (10 Minutes)

Scene: Agile Sprint Stand-up Meeting

Rotating Leader:
"Good morning team. This week I am the rotating leader for our sprint. Our deadline is next week, so today we need to check our progress. Let's start the stand-up meeting."

Proactive Member:
"I completed the login module and database connection. I updated my task in Jira as 'Done'. Today I will start the dashboard UI."

Rotating Leader:
"Good work. Updating Jira helps us track our progress. Passive Member, what about your API task?"

Passive Member:
"I didn't finish it yet. I had other work and I forgot to update Jira also. I will try to complete it soon."

Accountability Advocate:
"This is a problem. If tasks are not updated in Jira, we cannot track progress. Everyone must update their tasks and follow deadlines. Otherwise the whole team will be delayed."

Passive Member:
"Okay, I understand. I will update Jira and complete my task."

Rotating Leader:
"Confused Member, what about your UI design task?"

Confused Member:
"I am confused about my task. In Jira I saw two tasks assigned to me, but I don't know which one I should do first."

Proactive Member:
"We should clearly assign tasks and set priorities in Jira so everyone knows their responsibilities."

Accountability Advocate:
"Yes, we should also add deadlines and descriptions for each task."

Passive Member:
"Also, because leadership changes every week, sometimes instructions are different and it is confusing."

Rotating Leader:
"That is true. Shared leadership is good, but we need better communication and coordination."

Proactive Member:
"We should use Jira or Trello task board daily and track our tasks using To Do, In Progress, and Done."

Accountability Advocate:
"Yes, and we should have daily stand-up meetings to discuss progress and problems."

Rotating Leader:
"Okay team, from today:

- We will use Jira or Trello to track tasks
- Assign tasks clearly to each member
- Add deadlines and priorities
- Update task status daily
- Have daily stand-up meetings
- Everyone must be responsible for their tasks"

All Members:
"Agreed."

Rotating Leader:
"If we improve communication, accountability, and task tracking, our shared leadership will work better and we can finish the sprint on time."

(End of Role Play Acting)

PART 2 – GROUP ANALYSIS (7 Minutes)

Member 1:
"In our role play, we showed shared leadership in an Agile Scrum team where leadership responsibilities rotate between members. This helps teamwork, collaboration, and shared responsibility."

Member 2:
"However, our team faced several problems such as unclear responsibilities, missed deadlines, poor communication, and unequal participation."

Member 3:
"The passive member did not complete tasks on time, and the confused member did not understand their responsibilities due to lack of clear communication."

Member 4:
"We also saw that when tasks were not tracked properly, the team could not monitor progress and deadlines, which affected team performance."

Member 5:
"To solve these problems, we decided to use a project management tool like Jira or Trello. We can create a task board, assign tasks to each member, set deadlines, and track progress using To Do, In Progress, and Done columns."

Member 1:
"This improves accountability because each member is responsible for their assigned tasks and deadlines."

Member 2:
"It also improves communication, coordination, and time management in the team."

Member 3 (Conclusion):
"Therefore, shared leadership can be successful if teams have clear responsibilities, good communication, accountability, and task tracking tools like Jira or Trello."

PART 3 – OBSERVER FEEDBACK (3 Minutes)

Observer:
"As an observer, I noticed that the team faced several issues such as unclear responsibilities, missed deadlines, poor communication, and unequal participation. Leadership rotation also created some confusion in decision-making. Some members did not update their tasks, which made it difficult to track progress. However, the team later discussed solutions such as using Jira or Trello to assign tasks, track progress, set deadlines, and improve communication through stand-up meetings. These strategies can improve accountability, coordination, and team performance. In conclusion, shared leadership can be effective if teams maintain clear communication, accountability, and proper task tracking."

Very Important – Timeline (Follow This)

TIME	ACTIVITY
0–2 MIN	Meeting start
2–5 MIN	Discuss progress
5–7 MIN	Problems appear
7–9 MIN	Talk about Jira/Trello solution
9–10 MIN	Team agreement
10–17 MIN	Group analysis
17–20 MIN	Observer feedback
